Sample Vroom Tips for at Home

The Hand Wash

Let your child be your partner as you wash up before a meal. Say, "It's time to wash our hands, yours and mine." Put soap on both your hands and lather up. Be silly as you dry your hands off together. Do you shake dry? Toss the towel back and forth? Make a hand jumble? What else?

Suggested Age 12 months - 18 months

Brainy Background™

Making your child your partner in hand washing helps them learn about this important routine. A back-and-forth conversation with words and gestures, builds your relationship too. Say, "You can wash your hands!"

Silly Suds

Get silly while getting clean! Tell your child, "Let's wash your hands!" but start washing their feet. What do they do? Then say: "Oh! Those are your feet! Where are your hands?" As they get older, have them lead, using other parts of their body like elbows, wrists, and ankles.

Suggested Age 12 months - 3 years

Brainy Background™

Your child is using their focus to listen to your words and drawing on what they already know to play this silly game with you, which strengthens their memory. They're also practicing thinking flexibly about opposites, as well as learning new words and what they mean in a fun way!

Calm Down Kit

Use an empty shoebox or other container to make a "Calm Down Kit" with your child. Have your child put special items inside that help them feel secure and relaxed. When they are feeling upset, remind them to use their kit. They even can decorate the box to make it their own.

Suggested Age 2 1/2 years - 5 years

Brainy Background™

It helps to make a "Calm Down Kit" before upset feelings happen. You're helping your child plan for how to handle stress so they can take action in a difficult moment. This gives them more control. It also builds skills important to tackling challenges.

Stress Busters

During a calm moment, invite your child to come up with their own ideas for managing stressed feelings. You can make suggestions, such as using words to explain their feelings, hitting something that can't be hurt, or counting numbers. Try out the ideas and brainstorm others.

Suggested Age 2 1/2 years - 5 years

Brainy Background™

When you give your child some responsibility for coming up with their own ideas for managing stressed feelings, you're helping them learn to manage their emotions and behavior. You're also helping them learn to take on challenges.
