July 17, 2020

WARNING! Hand sanitizer contaminated with methanol is dangerous and should NOT be used.

The Food and Drug Administration (FDA) has tested hand sanitizers labeled as containing ethanol (or ethyl alcohol) and found some contaminated with methanol, which is toxic.

Check the specific list of hand sanitizer products on the FDA's website, <https://www.fda.gov/drugs/drug-safety-and-availability/fda-updates-hand-sanitizers-methanol>.

If your hand sanitizer is on the list, throw it out immediately! Consumers who have been exposed to hand sanitizer containing methanol and are experiencing symptoms (listed on the link above) should seek immediate treatment.

The list, updated Thursday, July 16, is attached to this email. The FDA is updating the list on an ongoing basis; if you can, visit the above link to view the most up-to-date list.

警告! 被甲醇污染的洗手液是危險的且不應使用。

美國食品和藥物管理局 (FDA) 測試了標有乙醇 (或乙醇) 的洗手液, 發現其中一些被有毒的甲醇污染。請在 FDA 網站上查看洗手液產品的特定列表, <https://www.fda.gov/drugs/drug-safety-and-availability/fda-updates-hand-sanitizers-methanol>。

如果您的洗手液在列表上, 請立即將其丟棄! 接觸過含有甲醇洗手液並出現症狀 (在上面的鏈接中列出) 的消費者應立即尋求治療。該列表已於 7 月 16 日 (星期四) 更新, 並附在此電子郵件中。FDA 正在不斷更新名單; 如果可以, 請訪問上面的鏈接以查看最新列表。
