WARNING! Hand sanitizer contaminated with methanol is dangerous and should NOT be used.

The Food and Drug Administration (FDA) has tested hand sanitizers labeled as containing ethanol (or ethyl alcohol) and found some contaminated with methanol, which is toxic.

If your hand sanitizer is on the list, throw it out immediately! Consumers who have been exposed to hand sanitizer containing methanol and are experiencing symptoms (listed on the link above) should seek immediate treatment.

The list, updated Thursday, July 16, is attached to this email. The FDA is updating the list on an ongoing basis; if you can, visit the above link to view the most up-to-date list.

ВНИМАНИЕ! Гель для санитарной обработки рук, содержащий метанол, опасен и НЕ должен использоваться. The Food and Drug Administration (FDA) протестировали гели для рук, на этикетке которых было указано, что в них содержится этанол (этиловый спирт) и обнаружили, что в некоторых из них также присутствовал метанол, который является токсичным.

Список таких гелей для рук можно найти на FDA вебсайте:

Если ваш гель для рук находится в этом списке, выбросьте его немедленно! Потребители, которые использовали гель, содержащий метанол, и у которых появились симптомы, приведенные в вышеуказанной ссылке, должны немедленно обратиться за медицинской помощью.

Список, обновленный в четверг, 16 июля, приложен к этому сообщению. FDA обновляет этот список постоянно. Если можете, посетите сайт, указанный выше, чтобы найти наиболее обновленный список.
