

Daily Health Check

*Health Check Questions

See [ELD COVID-19 Guidelines](#) document for response protocols¹

1. Has the adult or child been exposed to a person with a positive case of COVID-19 in the past 14 days? If so, was the exposure during the time from 2 days before until 10 days after the person with COVID-19 started having symptoms? If the person with COVID-19 never had symptoms, use the time period of 2 days before the test was taken until 10 days after as the infectious period.
2. Has the adult or child been exposed to a person with a presumptive case of COVID-19 in the past 14 days? And if so, was the exposure during the time from 2 days before until 10 days after the person with presumptive COVID-19 started having symptoms?
3. Is the adult or child experiencing new loss of taste or smell, an unusual cough, shortness of breath, or fever? “Unusual cough” means something not normal for this person (e.g., allergies, asthma).

Document that a daily health check was completed on every person entering and write down pass or fail only. Do not record symptoms or temperatures in order to maintain privacy.
